Access up to 3 different audio sources using 2.4GHz wireless digital audio technology

Music Sphere employs 2.4GHz wireless digital audio technology, allowing it to playback sound from up to 3 different audio sources such as a DVD home theater, MP3 player, CD player, VHS recorder or TV. If you're finished listening to a weather update on TV and want to listen to some music, it's as easy as simply pressing a button on Music Sphere to change the source.

Long-range wireless transmission means no cables or wires required

Just like a wired speaker generates sound when directly connected to a DVD system or TV, Music Sphere generates sound from an audio source, but does so wirelessly. A small transmitter connected to the DVD system or TV transmits wireless audio signals to Music Sphere at up to 30 meters (approx. 100 feet), so you can live a hassle-free lifestyle without worrying about messy cables and wires.

Dependable FHSS wireless technology for superior performance

FHSS wireless technology eliminates interference from other wireless signals and ensures Music Sphere delivers superior, great-sounding audio.

Unique audio system design for high-quality sound

Music Sphere features a unique 2.1 audio system that packs 2 stereo and 1 subwoofer drivers into a compact design to produce a total power output of high-quality 6-watt audio.

Chic design that's lightweight and ultra-portable

Convenient to carry from room to room, you can place Music Sphere in the kitchen, bedroom, basement or living room and listen to your favorite music, important news updates or variety shows. Music Sphere's elegant, contemporary design accentuates curves and lines all around, housed in a sturdy lightweight casing constructed from modern materials.

Digital clock

The digital clock on Music Sphere's easy-to-view LCD display lets you keep track of time so you'll know when your favorite TV or radio programs are and switch from one source to the other in just seconds.

Control audio source functions right from Music Sphere

Control functions of an audio source, such as a DVD system, from wherever Music Sphere is without ever having to go to the source itself. Simply point the source's remote control directly at Music Sphere and you can conveniently repeat or rewind a movie scene, or pause or stop playback - just as you would if you pointed the remote control at the DVD system.

Adjust Music Sphere volume / mute using any audio source remote control

Learn to easily control how you want Music Sphere to playback audio from anywhere, anytime. While in the bedroom, you can program an audio source remote control, for example, a TV remote control, so that it directly adjusts Music Sphere's volume and mute functions.

Adjustable sound effects

Customize the bass and treble speaker sounds so that you can listen to music the way you like it.

Can be powered by batteries

While an adapter can be used to power Music Sphere, you can experience true wireless convenience because Music Sphere can be powered by batteries to provide added flexibility and portability of being able to place it almost anywhere without being restricted by cables.

Wall-mount kit for remote speaker

Convenient to carry from room to room, Music Sphere is lightweight enough to mount on the wall, making it a decorative design centerpiece for your household.

Shielded speakers

Music Sphere's shielded speakers means not only can you place Music Sphere on a table or mount it on the wall in just about any room, you can position it beside a TV or computer without worrying about any static or signal interference.
